Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-10, drawn to a composite part with an integrated flow channel, classified in class 428, subclass 304.4+.
- II. Claims 11-18, drawn to a method of making a composite part with an integrated flow channel, classified in class 264, subclass various.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the process as claimed can be used to make other and materially different product such as one that replaces a fabric layer by a layer of a fiber reinforced composite material.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

A telephone call was made to Robert J. Sacco on 02/04/2003 to request an oral election to the above restriction requirement, but did not result in an election being made.
